
Clicking the "View Roles" button should navigate to a new page.

Stella

Clicking the "Edit Role" button should open a modal/dialog to update the role. The modal should close when saving or canceling the changes.

Stella

This is an example of what an interface for managing a contact's roles might look like.

The header displays the contact's full name, while the content consist of a table containing project names and the contact's role in each project. The table also includes an editing button to update the role.

Stella

Clicking the triangle dropdown icon will display options of roles.
